COMPLETE HEIGHT SOLUTIONS

About SNPS

We are a leading provider of fall protection products and systems. Through a combination of expert knowledge and practical experience, we have helped our customers increase the safety of their employees and contractors alike when working at height.

We are an Irish-owned company that entered the fall protection market in 2000, originally focusing on providing temporary safety solutions for work carried out by the roofing industry. We quickly recognised the need for clients to provide for permanent access and fall solutions at their facilities and added these to our collection of services.

Our comprehensive range of products and services offer fully compliant, practical solutions for structures of all types, in all industries.

Providing effective fall protection makes good sense and SNPS are here to help you make the best decisions for your business and the people that work in it.

We offer complete working at height solutions, supplying and installing the following across Ireland and the UK:

- Passive and reactive systems for working at height
- Temporary and permanent systems
- Bespoke solutions for non-standard applications

Through our large portfolio of clients we have provided solutions for establishments such as Diageo, Ikea, Tesco, Pepsi, UCD, Aldi, Lidl, NDFA, the OPW and the GAA to name but a few.

Services

Guardrails

We supply and install a variety of guard rail systems, including free-standing, top fix, front fix and collapsible, all of which are available with a choice of straight, cranked or curved uprights.

These systems are robust, modular and versatile to fit all roof shapes and sizes, with all of the above complying with BS6399, EN13374 and EN14122-3 standards.

Lifelines

We are approved installers for all Uniline safety systems. Uniline's horizontal lifelines provide passive and reactive protection as either fall restraints or fall arrests, complying with EN795 standards.

The comprehensive Uniline range of engineered safety systems provides customers with a choice of fully compliant, practical solutions, enabling them to resolve the risks associated with roof work and maintenance when working at height.

This product range can be used on a number of roof types, including standing seam, trapezoidal, single ply membrane, bitumen felts and composite panels.

Walkways

We provide a complete range of walkway systems for all roof applications, including: standing seam, composite panels, built up roof systems, secret fix and single ply membrane.

The walkway systems are manufactured from recycled PVCu and have a unique anti-slip surface. Customers can order these walkway systems in a choice of RAL colours.

All the above systems comply with pre-fabricated accessory standard EN516 – class 1-C and are resistant to corrosion, moisture and severe UV exposure.

Safety netting

All of our safety netting complies with EN1263-1 and EN1263-2 standards and the HSA's code of practice for safety in roof work, which means that it:

- Reduces potential falls
- Minimises the effects of falls
- Provides collective passive safety
- Allows a broad range of activity to continue with minimum restriction
- Saves time by allowing greater mobility for those working at height

Ladders

We supply and install access ladders for both internal and external use, including pivotloc, concertina and caged ladders as well as stepovers and bespoke solutions for non-standard situations.

Also, we can provide vertical fall arrest cable and glideloc systems, which reduce the risk of falls.

Bird control

Our complete range of bird control products and accessories have all been carefully selected to enable our customers to solve any bird pest problems effectively and humanely. Our list of products includes the following:

- Spike systems
- Birdscape
- Post and wire
- Pneubird bird repellent system

Facilities management

In addition to our extensive product list, we also offer:

- Recertification and maintenance of fall protection and access systems to EN795 and EN7883 standards
- Roof surveys, maintenance and repairs
- Gutter cleaning services
- Annual testing of safety nets to ISO1806 standards

Our services include:

- Guardrails
- Lifelines
- Walkways
- Ladders
- Safety Netting
- Sports Netting
- Bird Control
- Facilities Services
